

Week-1.R

josek

2025-09-08

```
#Week 1
print("Hello world")

## [1] "Hello world"
cat("Hello world")

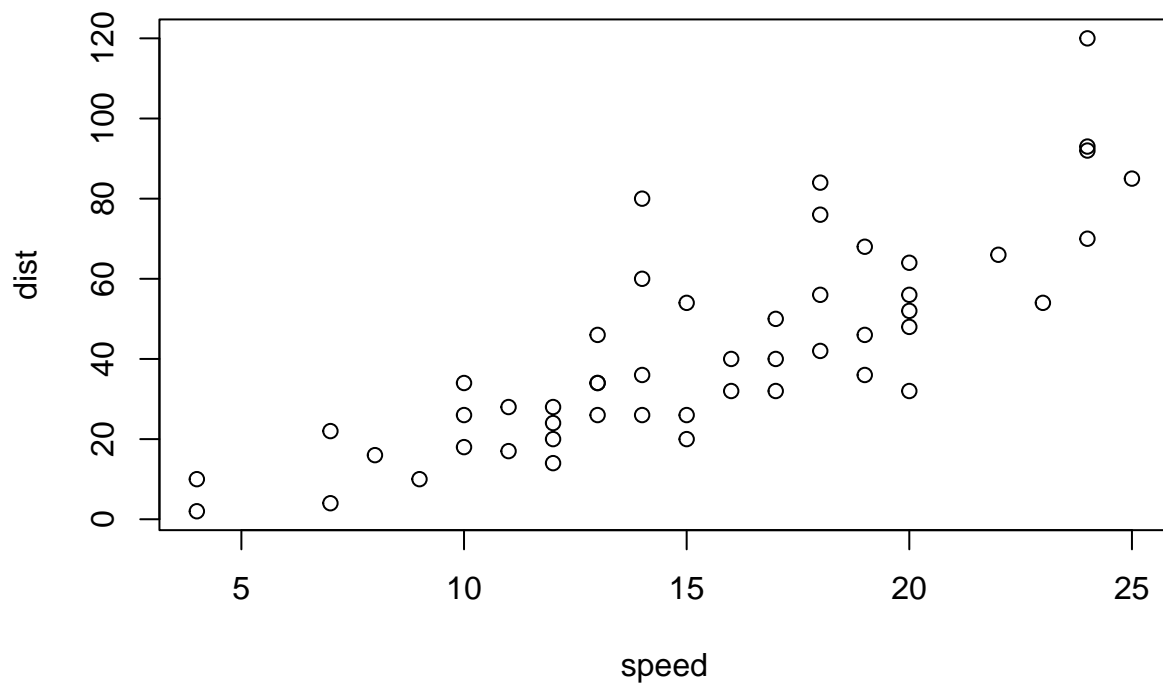

## Hello world
if(FALSE){
  "This is a demo for multi-line comments and it should be put
  inside either a single or double quote"
}

y <- c(3,6,7,8,4,3)
mean(y)

## [1] 5.166667
library(ggplot2)

## Warning: package 'ggplot2' was built under R version 4.4.2
# Use stdout as per normal...
print("Hello, world!")

## [1] "Hello, world!"
# Use plots...
plot(cars)
```

```
# Even ggplot!  
qplot(wt, mpg, data = mtcars, colour = factor(cyl))
```

```
## Warning: `qplot()` was deprecated in ggplot2 3.4.0.  
## This warning is displayed once every 8 hours.  
## Call `lifecycle::last_lifecycle_warnings()` to see where this warning was  
## generated.
